

## Exercise 4.2 – MongoDB Installation

Using the MongoDB Guide, complete the following:

1. Download and install MongoDB (make sure you select the correct operating system)
2. Once installed, take a screenshot of the confirmation window
3. Start MongoDB and take a screenshot
4. Start MongoDB Compass and take a screenshot
5. Take a screenshot of MongoDB Compass recognizing your MongoDB instance (there should be 2-3 databases: admin, config, and local)

6. Combine the images in single word document and include your name, date, and assignment
