Assignment 6.4 – Capped Collections

Using the "Create a Capped Collection Example," complete the following:

1. Start your MongoDB database
2. Enter the MongoDB shell
3. Create a new Capped Collection and name it "roles"
4. Set the collection size to 10,000 documents
5. Take a screenshot of the createCollection() operation
6. Combine the image(s) to a single word document and include your name, date, and assignment
