Exercise 6.2 – Unique Indexes

Using the "Unique Index Example," complete the following:

- Start your MongoDB database
- Enter the MongoDB shell
- Add a Unique Index to the "employee_id" field
- Execute the insert() operation to validate the Unique Index was added correctly
- Execute the insert() operation to validate the Unique Index was added correctly
- Take a screenshot of the ensureIndex() operation
- Take a screenshot of the first insert() operation test
- Take a screenshot of the second insert() operation test
- Combine the images in a single word document and include your name, date, and assignment
